

HN Startup Hunter

Product Demo — LemonSqueezy Review Submission

Live at: <https://hn-startup-hunter.onrender.com>

What It Does

HN Startup Hunter searches every monthly 'Who is Hiring?' post on Hacker News by skill stack — returning structured results with recruiter emails, tech stack, salary range, and company description. It solves a real problem: HN's monthly hiring threads contain 150-300 companies but are unstructured text walls. The app makes them searchable in <2 seconds.
